Newtown Creek Environmental Benefit Projects
Project List for City Parks Foundation Implementation
September 2011

Each proposed project has been assigned an estimated cost of implementation, based on the project's description, additional cost information developed by CPF, and the professional judgment of the State. The State proposes to place highest priority on implementing the projects in the "primary" group. If, after all the projects in the primary group are implemented or projects have been determined to be infeasible to implement and additional mitigation funds remain uncommitted, the State will propose a prioritized list of projects for implementation from the "secondary" group.

Project Descriptions	Location	Estimated Cost
Primary	**(ranked by implementation priority)**	
Greenpoint Boat House and Environmental Education Center	GMDC Building 1155-1205 Manhattan Avenue, Brooklyn	$3 Million
Wetlands Rehabilitation	Bulkheads along Newtown Creek, Brooklyn and Queens	$0.5 Million
